

MESSAGE

It is a well-known saying that education is a must of all human beings. Its inevitable attitude makes everything fine in the journey of a man with a hope reaching the unreached to get the perfection with an inner vision of wisdom in a sense of welfare for all.

On the other hand, we need to carry on teaching and learning process in an effective manner boosting with all our efforts. Then, what things do we need? The answer, if not mistaken, is 'Enlighten your teaching and learning process.'

With this view in our minds, we need complacent educators, well equipped infrastructures and other necessary things for the purpose. Apart from these things, I would like to appeal the parents, guardians and teachers to have careful association with their wards for a future goodwill.

XTRA-EDGE SCHOOL

Ghari Awang Leikai, Imphal

Dated, Imphal, The 27th May, 2024

After ten years of general education, the higher secondary stage is the stage of maximum challenge for the students. The students of this group are passing through a critical phase of their lives - transition from adolescence to youth, they have to take important decisions concerning their future career by choosing suitable courses. In fact, more than the need and aptitude, it is the awareness and performance of the students at this stage that ultimately determines their future. The school has to provide components that communicate essential values in their totality. Here in XTRA-EDGE SCHOOL, we thrive on the principle that every teacher has to be a teacher of values with congenial school goals, evolving discipline through participation of staff and students, wherever necessary, ensuing two-ways communication for redressal, welfare services, help to needy students, remediation, re-evaluation and non-rejection of poor achievers, formulating rules that ensure participation of every student in games, activities and programmes relevant to their interests. Let XTRA-EDGE help you to fulfill your hope and aspirations. It is an institution that won't just teach but help you start-up.

OUR MOTTO: EDUCATION IN UNDERSTANDING

A PREFACE

The XTRA-EDGE School is a co-educational institution imparting knowledge of science to students at the level of +2 with full equipped educators and well experienced guides who are almost desired by the parents and guardians. The infrastructure maintained is the global standard science equipment. Making a competition and a challenge, the educators perform the three inevitable things namely, the study circles, the library activities and enrichment activities for the young learners to make them perfect in this modern competitive world.

ABOUT THE SCHOOL

The institution, under the proposal of Local educationists and competent renowned persons, has rightly been established since the year 2011 with an affiliation to the Council of Higher Secondary Education, Manipur under the name, XTRA-EDGE SCHOOL with its affiliation No. 1/96/96 – HSC (Vol – IV): Imphal, The 13th July, 2011, at Sagolband Bijoygovinda Mamang Leikai by the M/S. XTRA-EDGE FOUNDATION.

The reckless attitude of everything is undesirable in education. Education itself is a never ending process with an attire in infinity. It must be formal and fact in its journey, not a fake. No doubt, this institution, within a short period of about 5 years, we have produced some students in the national and international standard. But, hope is like a ladder, leading the steps higher and higher still just to get possible results of our actions. And, as such, the shiftment of this institution from Sagolband Bijoy Govinda Mamang Leikai to Ghari Awang Leikai, Imphal West, from the session 2015 - 2016 is one of the approaches for a future betterment, where the teacher and the taught may enjoy complete serenity and appeasement in their activation with their studies without disturbance, having enough space, grounds and other well – equipped modern infrastructures, rooms and introducing computer class rooms for the purpose. Indeed, this new place may rightly be called a heaven for academic atmosphere.

XTRA EDGE SCIENCE STREAM

From the academic year 2015-16, the school expanded its academic offerings within the Class XI Science stream by introducing Computer Science as a distinct subject. This addition aimed to equip students with foundational knowledge and skills in the rapidly evolving field of computer technology, recognizing its increasing importance across various disciplines and future career paths.

Building upon this commitment to providing specialized academic pathways, the school further launched a unique integrated course starting in the 2021-22 session. This program is specifically tailored to support students with aspirations in the highly competitive fields of Medicine and Engineering. To ensure comprehensive preparation for the rigorous NEET and JEE entrance examinations, a dedicated team comprising experienced and expert faculty members has been assembled. The curriculum for this integrated course includes a structured weekly test series designed to strictly mirror the pattern and difficulty level of the NEET/JEE exams. After each test, students receive personalized feedback in counseling to help them improve their preparation. This specialized coaching for medical and engineering aspirants comes with a small extra fee. This fee covers the additional resources and focused teaching provided in the integrated program.

Expanding its offerings, the school has also introduced Health and Physical Education (HPE) as a subject starting from the academic session 2022-23. This initiative in Health and Physical

Education caters to students interested in sports careers. Recognizing the growing sports sector, the course aims to build a strong base in health, fitness, and sports science, potentially including practical training for athletic skill development. By offering this, the school shows its commitment to supporting the varied interests of its students, especially those passionate about sports.

XTRA-EDGE ARTS STREAM

XTRA-EDGE School took a significant stride in the field of education by introducing the Arts Stream at the Higher Secondary level in the year 2022. With a clear and ambitious vision, the school set out to provide top-tier Arts education to students across the state of Manipur — a region rich in culture, intellect, and creative potential. What began as a bold initiative has, in an impressively short span of time, blossomed into one of the most respected and sought-after centres for Arts education in the state.

Since its inception, the Arts stream at XTRA-EDGE has consistently delivered outstanding academic results. The school has proudly secured multiple positions in the top 10 of the state merit list — an extraordinary achievement that reflects not only the calibre of our students but also the school’s unwavering commitment to academic excellence, focused mentorship, and innovative teaching methods.

This rapid ascent to prominence stands as a testament to the school’s deep-rooted belief in quality education, personalised learning, and the power of nurturing young minds to reach their highest potential. As XTRA-EDGE continues to grow, it remains firmly dedicated to setting new benchmarks in Arts education and shaping future leaders who are as thoughtful as they are accomplished.

Shaping Bright Futures Beyond the Classroom

At XTRA-EDGE School, we hold a deep conviction that true education extends far beyond the pages of a textbook. While academic excellence remains a cornerstone of our mission, we believe that meaningful learning must also cultivate character, ignite creativity, and build strong communication skills. Our educational philosophy is rooted in the holistic development of each student — intellectually, emotionally, socially, and ethically — so that they emerge not only as scholars, but as confident, capable, and compassionate individuals prepared to navigate and contribute to an ever-changing world.

To support this comprehensive growth, XTRA-EDGE goes beyond traditional classroom instruction by offering a vibrant array of academic and co-curricular activities throughout the year. Students are encouraged to participate in poetry recitations, debates, academic seminars, film screenings, and enriching interactions with achievers from diverse walks of life. These events are thoughtfully curated to broaden their perspectives, stimulate critical thinking, and foster essential life skills such as leadership, collaboration, and public speaking.

What truly sets XTRA-EDGE apart, however, is the exceptional calibre of our faculty. Our team of dedicated and highly qualified educators brings not only subject matter expertise but also a profound passion for teaching and mentoring. They engage with students as guides and role models, nurturing each learner’s unique potential and providing the support needed to excel both inside and outside the classroom.

At XTRA-EDGE, we are committed to empowering students with the knowledge, values, and skills they need to flourish — not just in their examinations, but in all facets of life. We are proud to be shaping individuals who are not only academically accomplished but also thoughtful, articulate, and ready to lead with integrity.
